MANTAWARE™ CYBER MANAGER

The Integrated Cyber Defense System (ICDS) Solution for Military Deployments

Advanced Military ICDS solution, engineered to seamlessly orchestrate, automate, and respond to complex threats across multi-classified domains, ensuring unparalleled security and operational efficiency in the most demanding environments.

Cyber Manager solution is a Software and Hardware system designed specifically as an Integrated Cyber Defense System for military deployments, including marine, ground and air operations. Our platform empowers organizations to seamlessly integrate, automate, and orchestrate diverse security tools and processes, bolstering their security operations to new heights.

The primary objective of our ICDS solution is to revolutionize incident response by reducing response times, minimizing manual effort, and amplifying the overall efficiency and effectiveness of security operations. With Cyber Manager, your organization gains a competitive edge in combating an evolving cyber landscape.

SECURE NETWORK CONFIGURATIONS WITH VERSATILE DEPLOYMENT OPTIONS

Organizations seek flexible and secure network configurations. Cyber Manager

STREAMLINED LOG MANAGEMENT

Cyber Manager simplifies log management and cyber solutions, offering a straightforward and user-friendly experience. Seamlessly manage logs, generate comprehensive reports and establish alerts and playbooks through our intuitive interface.
